Amada TECH Dublex Home Lift

The AmadaTECH elevator will look great at home

With the AmadaTECH dublex lift in your two-storey house, you can go from one floor to the other with elegance and comfort.

Unlike conventional elevator, it is small in size and does not require major structural changes in the installation site, so it can be installed almost everywhere in your home.

When we send it up or down, it leaves an empty space thanks to our own design.

It is a model designed to make your home look great and you can enjoy it every day of your lift.

The pressure-sensitive safety surfaces stop moving when the connection is detected from top to bottom.

Break resistant glass used. However, for more safety, the elevator will move when the door is closed and the door will not be opened when the elevator moves.

When the power is cut off, your elevator automatically go down to the ground floor with the UPS system.
